Tom –

Wanted to touch base with you on this project.

It is my understanding that Carrie has set up a preliminary site visit with your staff set to occur the last week of February in order to review the proposed PN and site conditions.

Since this is past the due date for the public notice I was wondering if you would be amenable to granting us a 30 day extension ?

As you are aware this is a very complex project with considerable impacts to high value resources proposed. I'd like our comments to you to be based on as much information as we are able to obtain and I think a key part of this would be a site review with your staff on the proposal.

The resources at question have been defined as an ARNI in the past by EPA and our current thinking is

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

Please let me know if you are okay with the request and I will send you an email formally requesting one.

Hope all is well,

Jeff
